

Fluid Power Industry

Software enables

a better

CO₂ footprint

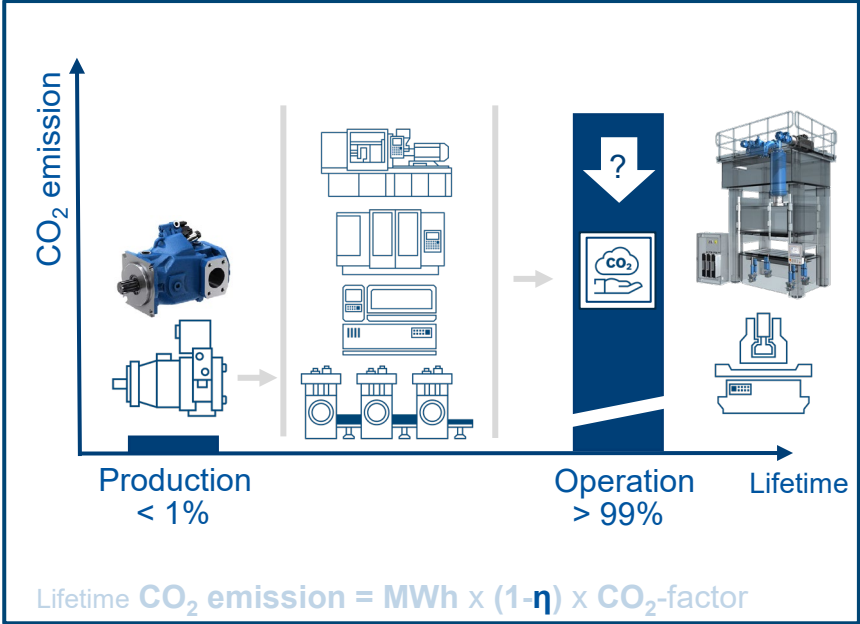

Dr. Steffen Haack
Bosch Rexroth AG

Software enables a better CO2 footprint

Carbon Footprint Scope 3

▪ Carbon Footprint Scope 3

Possible Measures

1. Mechanical Components
2. Hydraulic System Architecture
3. Mechatronic Components
4. Mechatronic System

Software enables a better CO2 footprint

Carbon Footprint Scope 3

- Carbon Footprint Scope 3

Possible Measures

- Mechanical Components
- Hydraulic System Architecture
- Mechatronic Components
- Mechatronic System

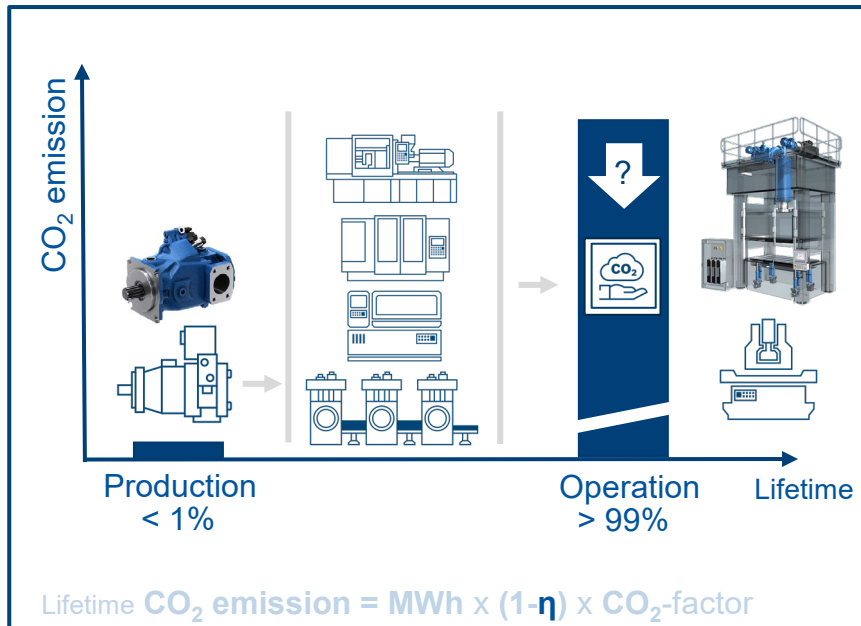

Software enables a better CO2 footprint

Carbon Footprint Scope 3

- Carbon Footprint Scope 3

Possible Measures

- Mechanical Components
- Hydraulic System Architecture
- Mechatronic Components
- Mechatronic System

2. Hydraulic system architecture

	Differential cylinder		
	1 Pump	2 Pumps	3 Pumps
	1 Drive		2 Drives
Open circuit			
Closed circuit			

Software enables a better CO2 footprint

Carbon Footprint Scope 3

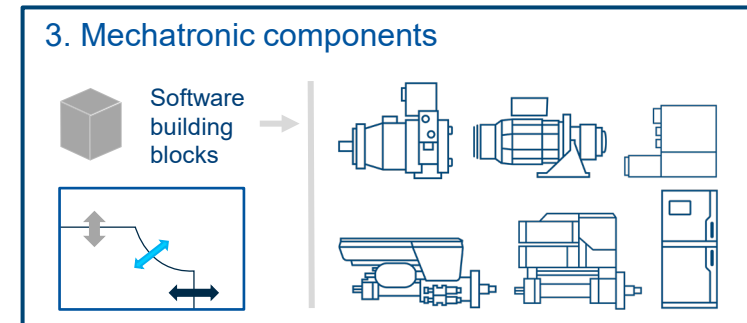

- Carbon Footprint Scope 3

Possible Measures

- Mechanical Components
- Hydraulic System Architecture
- Mechatronic Components
- Mechatronic System

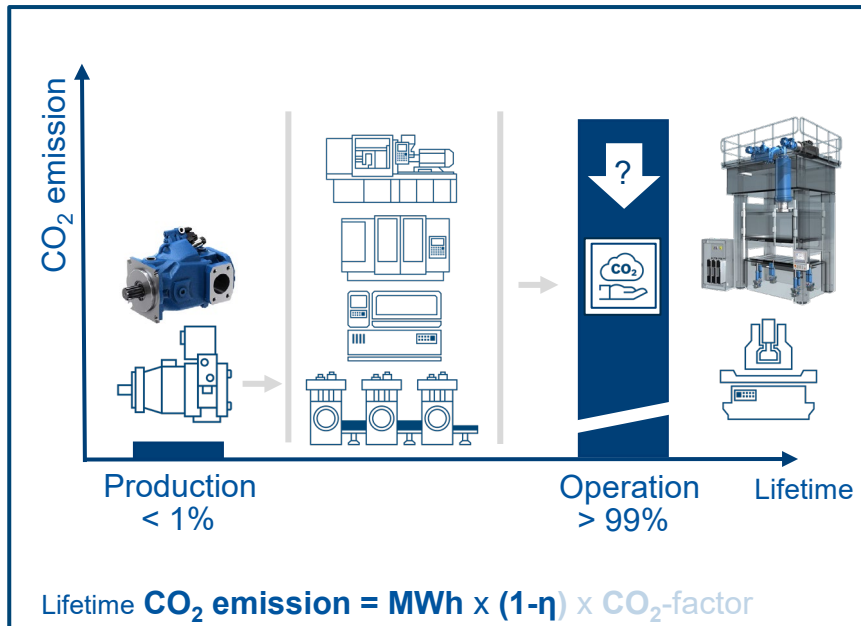

Software enables a better CO2 footprint

Carbon Footprint Scope 3

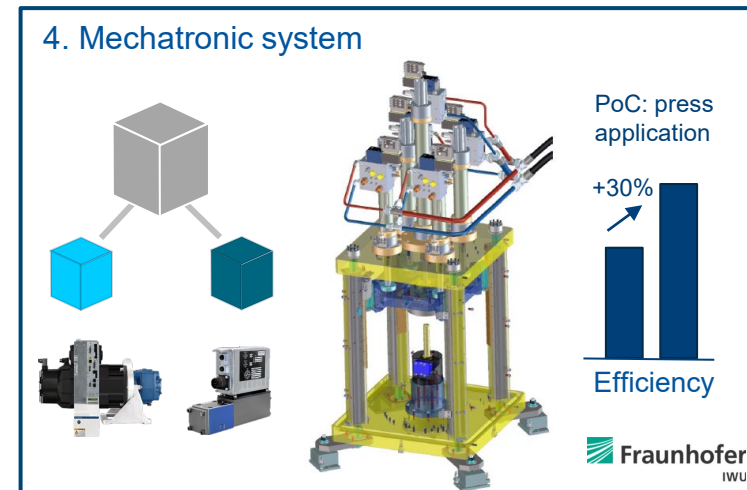

Carbon Footprint Scope 3

Possible Measures

1. Mechanical Components
2. Hydraulic System Architecture
3. Mechatronic Components
4. Mechatronic System

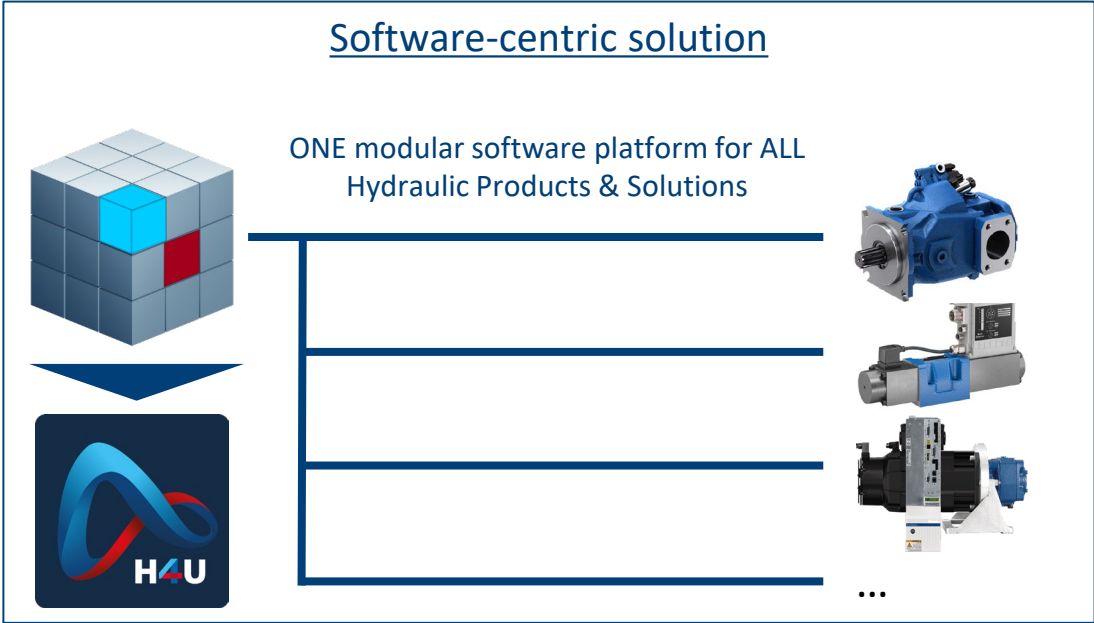

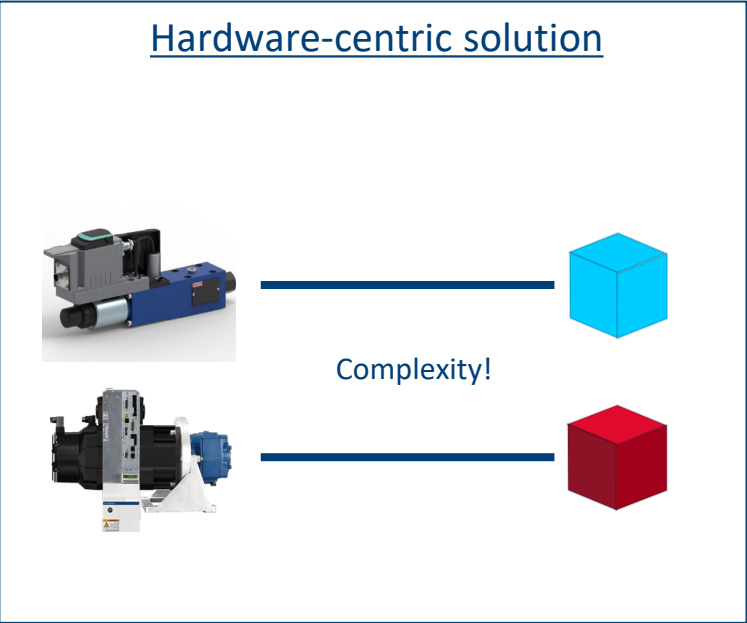

Software enables a better CO2 footprint

Software-Centric Hydraulics

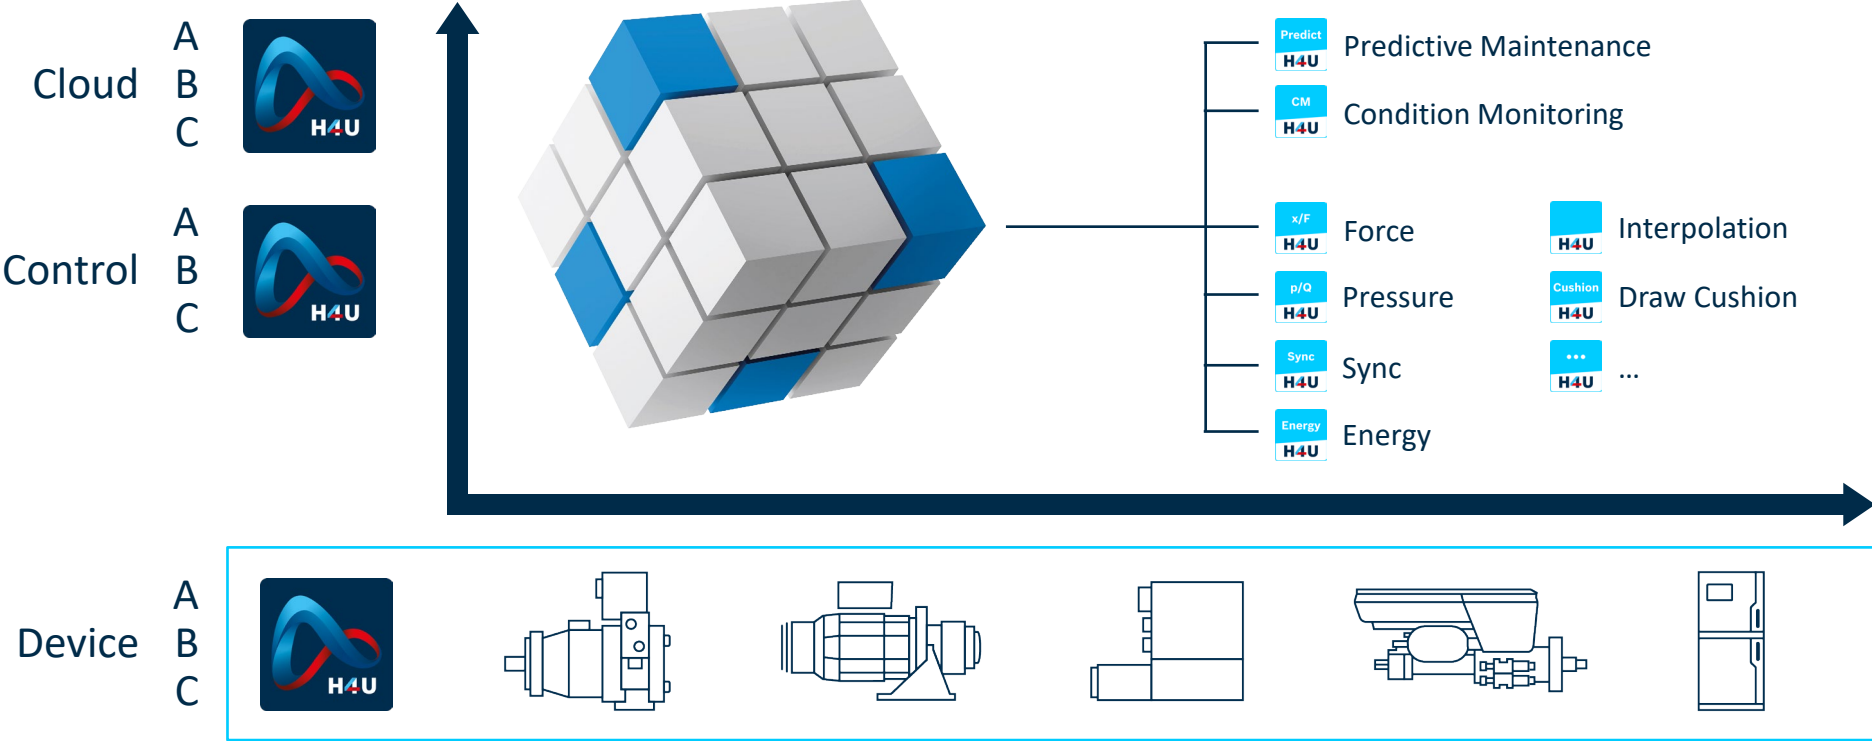

- Carbon Footprint Scope 3
- Economic Efficiency & Faster Time to Market

Software enables a better CO2 footprint

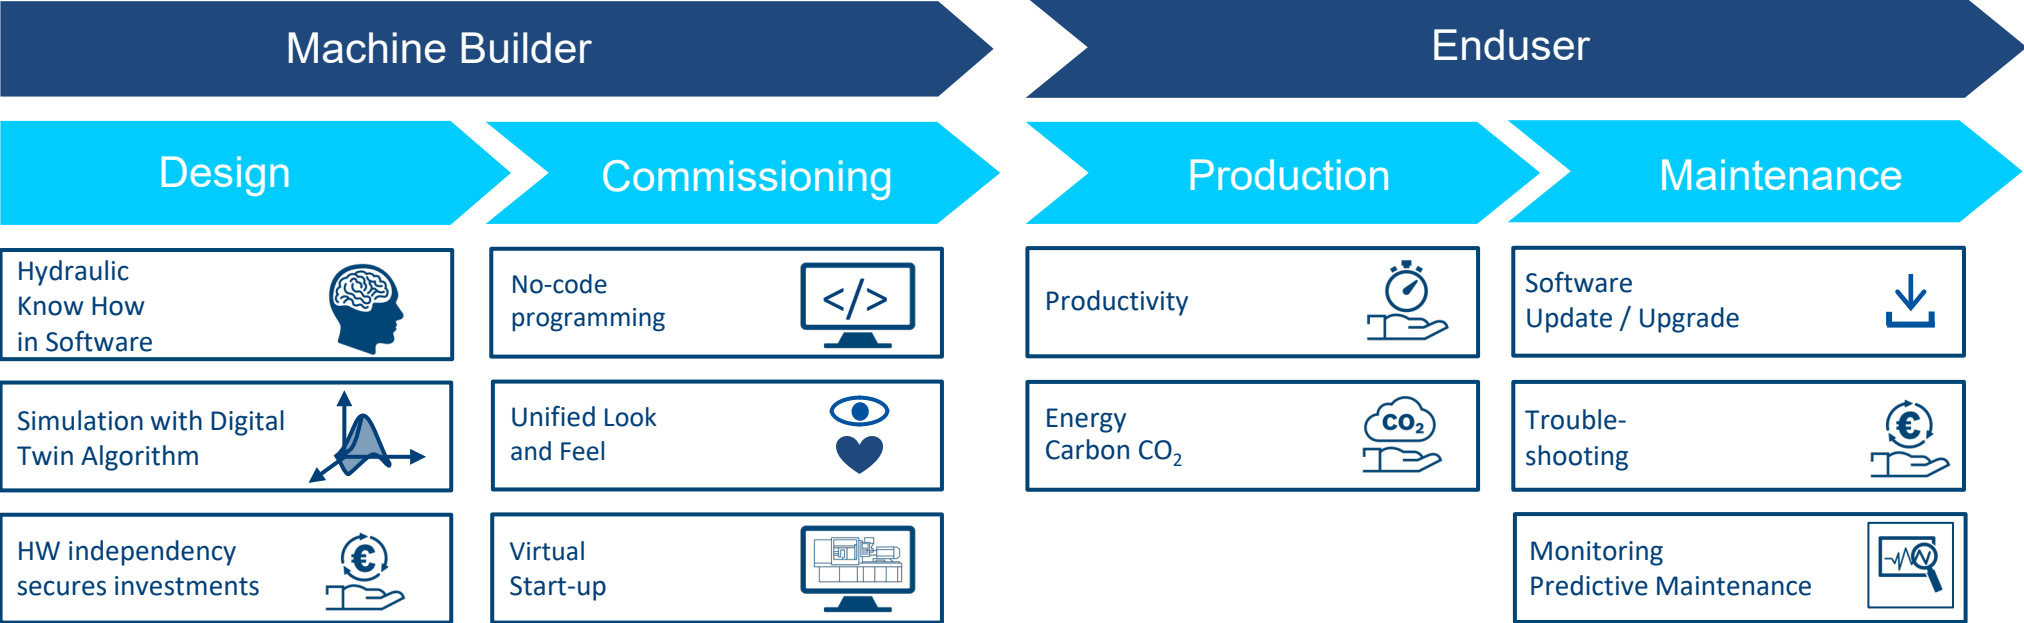

Flexible Deployment

Embedded in open source or established automation ecosystems

Software enables a better CO2 footprint

Added value in the life cycle phases

The new digital

dimension of

HYDRAULICS
